

MASK & CLOTH FACE COVERING ETIQUETTE

Even with a mask, try to maintain a 6-foot distance if possible.

Be respectful to people who do not wear a mask. You don't know the reason. Many respiratory, dermatological, or other medical conditions make any kind of face covering difficult or even impossible to wear.

Shouting, singing, sneezing, or coughing will drive particles, including viruses, through most masks. Avoid shouting and singing and protect a sneeze or cough with a disposable tissue or use your elbow. If you sneezed or coughed into your mask, change it immediately. Wash your hands.

Do not place your worn mask on a surface another person may touch (such as your desk).
